- Adjust page order
- Upload images faster
- Convert PDF images to TIFF
- Manage all pages on one screen
- Eliminate marks and blemishes

### Save time and reduce costs

CSC provides a secure, web-based electronic recording solution that allows document submitters such as title companies, law firms and financial institutions to electronically record real estate documents with county recording offices throughout the U.S.

CSC is the only direct provider of a total recording solution that encompasses paper recordings in counties that do not yet accept electronic documents. Whether it's paper or electronic, CSC can record it.

Formerly known as Ingeo Systems, our eRecording division was the pioneer of electronic document recording in the U.S. CSC was recognized by the 2012 Mortgage Technology Awards for our impact on the mortgage industry, and we have provided business solutions to the legal, corporate and financial communities for more than 110 years.

### It's easy to start eRecording.

A computer, Internet connection and scanner/printer are all you need to start eRecording today. We offer state-of-the-art technology and a responsive, experienced staff to support your business.

Submitters uniformly praise our faster processing speeds, comprehensive features for handling electronic documents, ease of workflow and substantial savings in cost and time.

Plus, with CSC you can rest assured that your documents are in full compliance with federal, state and local laws as well as industry standards.
